

SunFilm

Grain and Silage Bags

SunFilm

Sunfilm® Grain and Silage Bags, featuring our advanced SmartStructure® technology, provide the protection your bales deserve in a fully recyclable bag. One of the top field storage solutions on the market, Sunfilm® is compatible with modern, high-capacity baggers and extractors and allows for filling in the field to help save time, labor, storage, and fuel.

Ideal For

- The storage of silage and grains in the field
- All silage baggers, grain baggers, and high capacity bag extractors

Features and Benefits

- All-weather design: field tested and proven performance for use in North America's harsh winter climate as well as high heat situations
- 50% greater tear and puncture strength
- Twice as resistant to "slumping"
- 24-month warranty to withstand ultraviolet exposure under normal circumstances *
- Superior oxygen-limiting properties protect against spoilage
- Certified FDA-compliant and produced with approved polymers
- Fully recyclable bag

Sunfilm is the new standard for excellent, product performance and customer satisfaction.

Save time, labor, storage, and fuel costs and speed up your grain harvest.

No more hauling long distance for storage. Creates great on-farm storage.
