

# Productivity and knot quality never seen before on HD balers!

## EnergyX

The flexible binding system obtained through EnergyX®, indeed, is able to dissipate the energy of the strongest impacts, keeping the bale always close-packed. For superior protection!

In EnergyX® the highest performances finally coexist with a reduced diameter of the twine.

This allows to obtain spools with a length never reached before by HD baler twine. For unmatched productivity!

The optimal diameter and the dynamic technology of EnergyX favour the knotter's performances ensuring:

- a superior shock absorption capacity
- unrivalled protection of the knot from breakages and slippages.

# REKORD ENERGEX

Tech

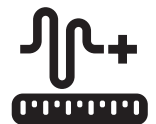

Rekord with EnergyX	Colour	Length (ft)	Knot Protec. Energy	Spools per pallet
Ultimate	Rust	4,160	93 J	48
HD	Violet	4,700	82 J	48
Extra - big spool	Pink	6,400	68 J	36
Extra - regular spool	Pink	4,700	68 J	48
Power	Blue	4,850	65 J	48
