

NX Exclusive Technology

► **Medium sized mesh**
NX is a performing solution that allow to produce netwraps with reinforced and thicker threads.

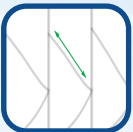

► **Thicker & Stronger chains**
Novatex NX mesh is made of stronger and thicker threads, ensuring higher strength and more ability to withstand repetitive handling.

► **Better cling on the crops**
The NX Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the ME netwraps hook up fast and easily.

► **Mesh with fewer knots**
Knots are the critical points of any thread. Novatex NX netwraps have half the number of knots with respect to standard netwraps.

► **Flexible geometry**
The reduced number of tension points (knots) aid natural movement of the weft, leaving it free to stretch in width.

Starnet is a high strength, high-performance net wrap designed for the North American straw, hay and silage market. Its rugged construction provides extra strength for springy crops that would normally need extra wraps of the conventional net to carry out the same job. When the going gets tough, Starnet has proven to be a strong, reliable net wrap and consistent performer.

Starnet

- UV Stabilized
- Less knots per mesh
- Left/Right indicator
- Red End of Roll Indicator
- Roll Cradles
- Roll Handles
- Length Measurement of Each Single Roll

Starnet is designed for the needs of the North American market

Width	Length		
AVAILABLE SIZES			
48"			12,500'
51"			12,500'
64"		9,700'	
67"		9,700'
